Thursday 12-13-07

The club meeting was held as usual at the Pizza Place in Sebree and we had 12 members present. The only thing we have as far as upcoming events is the snow bird fly in on the 1st day of the year, and if you are not there this letter wont help because you will see it after the fact.

Mike Morton won the gift certificate and that's the name of that tune.

If you did not attend the meeting you missed out on voting for officers as all ran unopposed so you are stuck with all of us.

Wednesday 12-19-07

8 of us out today, Harold, Tina, Doug Locke, Randy, Tom sheffer, Bob Friels and me.

Tom only brought one plane to the field and he had a bad landing so he was done for and left early, Harold crunched one of his zoom zoom's but he had another and from what I hear Bob crashed one of his, so I'm glad I left early, when I left they were still flying so I guess they had a good time.

Wednesday 12-26-07

The year is almost up and flying is getting more sparse especially for me. Six of us came out today, Harold and Tina, Doug and pickle and me and one trainee that pickle was working with.

They were flying their zoom zoom's and I was flying my profile, I was having a bit of engine trouble but it was working. Tina and Doug and Harold and pickle were flying around with their super fast little planes and Tina came by upside down and Doug was with her right side up and somehow they came together and Doug lost half of his wing, Tina lost her prop but managed to save her plane, Doug was not so lucky as his plane went into a death spiral all the way to the ground, depending on who tells the story as to what happened ☺. Doug had a spare wing and managed to repair his fuselage and up they went again they were still at it as I left.

1-1-08 Tuesday

We had a heck of a crowd, the temperature was somewhere in the high teens low 20s, but we had a warm building and lots of good food, they were in and out all day long and we ate and did a lot of hanger flying. I did not fly as every time I went out to get my plane ready common sense made me go back inside were it was warm, the wind was awful all day long but the food was great, Mike made his famous beans and rice and sausage and Tina had chili and Jeff Lyman and his wife brought more chili and home made bread, and Mr. Phelps brought corn bread and lots of pecan and apple pies, I got a sugar high just

sitting in there, if you missed it well I feel for you.

Saturday 1-05-08

It has rained all day and the crew has gone to Hanson to fly in the gym, the meeting has been changed to Thursday's and has me all screwed up as to when to get the newsletter printed, so this is all for this month, don't forget the meeting this coming Thursday 1-10-08
