1-09-08

8 flyers out today, probable the best group we have had in quite a while, Bill Robertson came out and flew haven't seen him in a while, Bob Freils is another one we have not seen in a while, Tina Pickle and Harold Doug also, they flew their zoom zooms and I flew my profile once, the elevator servo gave up, had to land it without an elevator hard on props that way, rudder servo got stripped on landing, I'll find out why the servo quit.

Got out my pro trainer and flew it, done much better with it.

I fixed my profile today, the elevator servo had a broken motor wire so I just re soldered it and the rudder servo had a stripped gear so I repaired that, I think I am ready to do it again.

Sunday 1-27-08

Just Mike and Darrell and I out today, only Mike flew Darrel and I watched, best day of the week so far, been cold and rainy and cold and did I mention cold.

Tina said she went down to Hanson, I don't know where Harold was but I'm sure he was doing something Important.

1-10-08 Thursday

The meeting was today, we had 11 members present, the only thing we had to discuss that was of any importance was the date of the fly in, we decided to move up one week to let Mack come up and fly with us, all the rest of the year he is booked up and can't make it, we will see how it goes, just keep it in mind that it is the second weekend in September now, don't forget and also remember to let your friends know.

I won the gift certificate, for a change, I was so happy!

As soon as Tina sends me the schedule for the year I'll put it in the letter.

2-06-08

Well here it is, another month has passed and the flying was almost at a stop, we went out a few times since the snow bird fly in, the weather has been awful and not very much fun, Tina and Harold and a few others have been doing a lot of indoor flying with their electrics but that is about the extent of it.

I have informed Tina and Harold and a few others that I have decided to give up my position as editor of the newsletter for personal reasons, I have to many other Irons in the fire and don't have the time to do it justice, and it is no longer fun for me as I have started doing other things expressly my cycle riding and a chapter of the

BTW that I have started down here in Western Ky.

BTW, stands for brothers of the third wheel witch is a triker's organization.

If anybody is interested in doing the newsletter, please don't hesitate to let me know, or someone in the club.

I am not giving flying up completely but I am going to cut way down, I plan on riding all summer and have a long bucket list to fulfill.

See you at the meeting this coming Thursday February 14 at the Pizza Place in Sebree at the same time as always.

January

1-Robards Snowbird
14-ERCMAC Board
19-Columbia, TN Swap Meet
