Tuesday 7-10-07

Club meeting was held as usual at the Pizza Place in Sebree, we had 11 members present.

The main topic was the fact that the electric fly in was a success and we are going to do it again next year.

Also we have a new member, his name is Mike Kouglar and I will give more details as soon as I get them. Mike Morton said that financially we are solvent, I guess that means we have all our bills paid.

The gift certificate was awarded to Larry Barnes.

Wednesday 7-10-07

We had around 7 or so out today, lots of flying and good company. Cindy brought out lunch for all who wanted, we had meat loaf and lots of other goodies, pickle sure is lucky!

Sunday 7-22-07

Got back from my 1800 mile motorcycle trip to Charles City Va. That's a suburb of Richmon, we had a great trip with nothing going wrong and even Mary enjoyed it.

We had over a dozen pilots out today and we had a great time, lots of flying and lots of hanger talk, sure is good to see people coming out of the air conditioning and enjoying natural air. Larry Barnes and JT Clark and the boys all flew as did Harold and I, Jeff

Lyman and Mike Morton Kim and the girls, and others, Tina was not there I think she went down to Florida with her best friend Stacey to do some scuba diving, When I left they were still at it.

7-29-07 Sunday

Very nice day for flying today, Tina and Mr. Z and Thomas Sheffer and I'm sure a few others were in Bowling Green at their fly in, but we had around 6 or 7 out flying at our field and we had a great time.

JT Clark came out with a new super star and it was powered with a YS 120, Mike Morton had the pleasure of taking it up for it's first flight, seing as he was the one who assembled it, and he had one heck of a ride, he kept trying to adjust the elevator and throttle settings and as the Futaba 9 Z radio had the trims on those two channels crossed he was putting in the right inputs on the wrong channels and he could not figure out what was going on, the more down he put in the elevator the more the throttle would go up and the

more down he put in the throttle the more elevator he was getting so the plane was going straight up, and he finally got it on the ground and he was just about to give it up for a lost cause, they finally figured out what was going on and finally had a very successful flight, nice flying and a very nice plane glad they saved it.

Mike Stone flew his little Astro hog Bipe and did very well, Darrell flew a trainer and I flew my pro trainer and my pro bro profile and also my electric wing, JT finally got to fly a bit, he flew his Sukoi, Mike Clark flew his foamy electric, Mike Morton flew his Corsair. Harold was having a bit of tank problem on his Harrier 3D and he flew electric, when I left they were still at it.

Wednesday 8-01-07

Not to many out today, Just Harold and Doug and I, and later Randy and JT Clark.

Doug was setting up a helicopter for a fellow flyer of his, and Harold and I flew our electrics.

Randy came out later that afternoon and flew his electric for a while, he said his wife was back at home and doing better, she started taking a few steps with the aid of a walker, for those of you who did not know,

she contracted a staff infection in her artificial knees and they had to remove them, she is learning to walk without them, glad she is doing better.

Saturday 8-04-07

Just Harold and I, Tina and Mr. Z went up to the Jasper fly in, and they camped out, I don't know if anybody else went up, I'm sure they did. The weather is the reason there has not been anybody out to fly this weekend, at least when Harold and I go. It is suppose to be around 100 tomorrow so I will not be there, I think I'll stay in the cool garage over at my sons cycle shop and work on my truck, I'm putting an engine in it and should be ready to drive it out in a few day's. I'm also working on my bike at home, have a bad wheel bearing.

Anyway this is it for this month, just remember it will be September in a little while and the fly in is on.

Just a few words about Mack Hodges, I don't believe he will make it this year as he has prior commitments, also on the same note, his brother had a plane crash down in Georgia with Mack's full scale Cub, he is in serious condition and I and I'm sure most of our club wish him a speedy recovery and best wishes.

I need everyone to send me an E-mail, (if you have it). Specifically I need to confirm your contact phone number, (the one you would want me to call if I needed to get in touch with you). By sending me an E-mail; I will be able to confirm your address.
